Group B - Week 2 - Memo

This week we will split the dataset into Train-Test-Validation datasets and complete the code for the logit/logit-lasso model. Additionally we will begin the HTML code.

Tasks completed (up to 07/08/2024):

1. Created Github Repository and Codespace for the project.
2. Cleaned CSV files. Using primary keys `id`, `'who'`, `'when'`.
3. Created MySQL DB along with tables for each CSV file.
4. Joined tables to reports using LEFT JOIN by primary keys, Exported table to .dat

ER Diagram on 2nd page.
